

Phoenix Tandoor Ovens

for your
TRADITIONAL INDIAN COOKING

WHY PHOENIX?

+ **Designed for outstanding results**

Phoenix Tandoori Ovens combine traditional Indian cooking techniques with modern design elements resulting in an oven that produces outstanding cooking results.

The various design and engineering qualities incorporated in our tandoors provide a definitive competitive advantage to our clients.

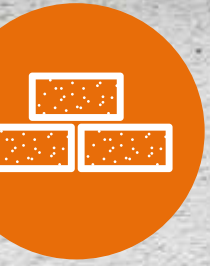

+ **Bespoke design**

We offer a true customization service allowing the client the flexibility to select from a range of unique features and options available from few other oven manufacturers in the world.

This document explains a few of the many reasons why Phoenix Prime Focus are world leaders in tandoor oven design and performance.

SUPERIOR CONSTRUCTION MATERIALS & TECHNIQUE

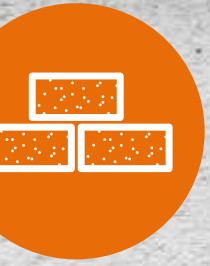

- + **Structurally reinforced for longevity**
Phoenix uses premium grade refractory material in the inner drum which provides higher heat retention and greater structural integrity properties ensuring improved thermal efficiency and a longer lifespan of the tandoor.

The inner drum is formed in a single cast piece which is baked at 800 °C to create the durable ceramic finish.

Traditional clay pots are prone to cracking and potential structural collapse requiring full replacement.

- + **Performing and safe**
The Phoenix ceramic drum provides similar cooking characteristics to traditional clay but without the risk of cracking and collapse.

SUPERIOR CONSTRUCTION MATERIALS & TECHNIQUE

Replacement of the inner drum results in disruption to the kitchen, added cost and possible downtime of an entire workstation if the unit is integrated into work benches with other equipment.

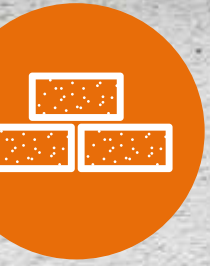

The cost and disruption must be considered several times over the life of a tandoor.

+ Guaranteed quality

Our industrial construction technique ensures that the internal cooking pot NEVER needs to be replaced.

We are so confident in the quality and performance of our tandoors that a 4 year structural warranty is included for all ovens.

SUPERIOR CONSTRUCTION MATERIALS & TECHNIQUE

- + **Superior insulation materials**
All tandoors are insulated with high quality thermal materials to improve heat retention and improve energy efficiency. The insulation also ensures the worktop surface remains at a safe operating temperature.

Many traditional units do not include any insulation and as a result are less efficient and can become dangerously hot around the oven mouth.

FUEL OPTIONS

All Phoenix tandoors can be either:

- **Charcoal fired**
- **Gas fired (various gas types)**
- **Electric heated**

Gas and Electric systems have been designed with minimal housing clearance, reducing the customary large and unsightly S/S cover which can be an impediment to the operator.

EXTERNAL SHAPES & CLADDING OPTIONS

+ Choice of external shape

- Round
- Square
- Barrel
- Other custom shapes on request

+ Choice of cladding finishes

- RAL colours
- Sheet metal and patterned metal
- Specialty coloured and textured metal
- Other custom finishes on request

CUSTOMIZATION AND FLEXIBILITY

+ Workstations and Custom Benchtops

Phoenix can design and supply custom benchtops and multi-unit workstations to suit your exact requirements. Benchtops can include GN wells and hanging rails for skewers.

Support tops can be supplied to suit stone insert (stone supplied by others).

Removable saj dome cooktops available to suit all tandoors.

+ Mobile tandoors

Phoenix are able to customize tandoors as required by our clients resulting in unique products tailor made to fit the individual project needs.

Mobile tandoors can be created by fitting the unit to custom built heavy duty trolley suitable for movement into private dining rooms or outdoor kitchen areas.

SELECTED BY CUSTOMERS AROUND THE WORLD

- Mandarin Oriental: Bangkok & Jumeriah Beach Dubai
- Four Seasons Hotel Bengaluru at Embassy ONE, India
- Park Hyatt Mallorca, Spain
- Wyndham West Bay Doha
- St Regis, The Palm Dubai
- Rotana Al Jaddaf Dubai
- Ramada Meridin, KL
- Dusit Thani Laguna Singapore
- DoubleTree by Hilton, Mankhool Dubai
- Regala Hotel Skycity, Hong Kong
